

WELCOME

**WORLD'S FIRST
PRO SMART CONTRACT in OpBNB**

ABOUT OP RIDE BULL

- The opBNB network is decentralized because it doesn't rely on a single client implementation. It also uses OP Stack, which is a modular solution that can support multiple clients and data access layers. Low transaction costs opBNB aims to make transactions 10 times cheaper than the current cost. On the testnet, the minimum gas price of Layer 2 is set to 0.2 gwei, which can reduce the transaction cost to as low as \$0.005 per transfer transaction.

OP RIDE BULL

WHAT IS CRYPTO CURRENCY

Cryptocurrency, or crypto, is a digital currency that is not controlled by a central authority like a bank or government. Instead, cryptocurrencies use a decentralized system to record transactions and manage the creation of new units.

In 2025, BNB Price Prediction are expected to cross the \$5,141.56 average price level according to BNB forecast and technical analysis. By the end of 2025, BNB's minimum price is expected to be \$4,903.88. Additionally, BNB can reach a maximum price level of \$5,280.58. At the end of 2025, BNB will have an average price of \$5,280.58. The crypto market expects a significant price shift. BNB HAVE BRIGHT FUTURE EARN BNB WITH OP BULL

The opBNB network is a Layer 2 scaling solution for the BNB Smart Chain (BSC) that allows users to interact with the blockchain with low fees and high throughput
